the law holmes said is no brooding omnipresence in the sky if that is true writes david luban it is because we encounter the legal system in the form of flesh and blood human beings the police if we are unlucky but for the marginally luckier majority the lawyers for practical purposes the lawyers are the law in this comprehensive study of legal ethics luban examines the conflict between common morality and the lawyer s role morality under the adversary system and how this conflict becomes a social and political problem for a community using real examples and drawing extensively on case law he develops a systematic philosophical treatment of the problem of role morality in legal practice he then applies the argument to the problem of confidentiality outlines an affordable system of legal services for the poor and provides an in depth philosophical treatment of ethical problems in public interest law

among members of the legal profession and judiciary throughout the world there is a genuine concern with establishing and maintaining high ethical standards it is not difficult to understand why this should be so nor is it difficult to see the professional standards are not completely divorced from ordinary morality indeed legal ethics and professional responsibility are more than a set of rules of good conduct they are also a commitment to honesty integrity and service in the practice of law in order to ensure that the standards established are the right ones it is necessary first of all to examine important philosophical and policy issues such as the need to reconsider the boundaries between on the one

hand a lawyer's obligation to a client and on the other the public interest it is also to be appreciated that conflicts of interest are pervasive and that all too often they are so common that they are not recognized as such yet rarely is public policy clearly cut the underlying themes of this book are that the move to more definite rules is not only inevitable but also desirable that existing codes of professional practice cannot simply be treated as a system of specific rules that the current set of ethical rules is contestable and requires further refinement perhaps even radical surgery and that legal ethics must be conceived in the more general area of professional responsibility the wider ethical issues of the operation of the legal profession as a whole are now firmly on the agenda both law schools and law professionals have a role to play in developing acceptable standards in this area and it is therefore appropriate that the essays in this volume are written by a distinguished group of law teachers and practitioners together with senior members of the judiciary the book opens with an overview chapter followed by three chapters analysing the ethical rules pertaining to the judiciary the bar and solicitors written by respectively the master of the rolls anthony thornton and alison crawley and christopher bramall the following three chapters look at the specific issues of confidentiality michael brindle and guy dehn and the particular ethical problems in the family and criminal law jurisdictions sir alan ward and professor andrew ashworth respectively chapter 8 by sir alan paterson discusses the teaching of legal ethics whilst chapters 9 and 10 by marc galanter thomas palay and cyril glasser put the subject in its wider social and professional context the book finishes with a chapter which examines what lawyers may learn from looking at the study of medical ethics

since the last edition of ethics professional responsibility and the lawyer was published the lawyers and conveyancers act 2006 has been enacted and rules of conduct and client care replaced the rules of professional conduct for barristers and solicitors in 2008 consequently there have been huge changes to the field of legal ethics this new edition incorporates these changes and the relevant jurisprudence and includes expanded analysis of associated key topics including lawyer client relationships and conflicts client confidences privacy and duties of care legal ethics is a compulsory course for all new zealand law students and an integral part of the lawyers professional life making ethics professional responsibility and the lawyer a must have text for all current and aspiring lawyers reflects and discusses the changes to the legal profession and its ethical and professional responsibility requirements with the implementation of lawyers and conveyancers act 2006 and the new rules of conduct and client care expanded discussion of duties of client care privacy

litigation duties and confidence clarification of distinctions between confidentiality and privacy extensive revision of sections on lawyer client relationships especially the cab rank rule and termination and lawyer client conflicts

how do ethical norms relate to human nature this comprehensive and interdisciplinary volume surveys the latest thinking on natural law

many law professors aim to probe deep ethical issues in class but they need to cover the material that the multistate professional responsibility examination requires the rotunda nutshell fulfils that need as it digests the model rules in an engaging analytical and often critical way in a surprisingly pithy manner this book places the rules in an historic context that lets the student understand problems with prior versions of the rules and the model code the nutshell also analyzes the american law institute s restatement of the law governing lawyers third this approach frees up precious class time for important normative issues and this nutshell helps your students come up with better answers to your socratic questions than you anticipated

the law is going through a period of deep crisis exemplified by continuing revelations of miscarriages of justice which calls for radical reassessment of the relationship between law and morality the technocratic efficiency aimed at by modern law can no longer be perceived as a substitute for the law s failure to deliver justice this new study seeks to reopen the law ethics debate from a postmodern perspective and calls for a radical reassessment of the relationship between law and morality it argues that the separation between law and ethics led to the failure of the law to deliver its promise of justice and claims that only by taking seriously a philosophy of otherness can the law be transformed into an acceptable ethical basis of social communication otherwise it will remain divorced from ethics and its decline into amoral technocratic management will continue the authors of this book confront an issue of great contemporary concern in an innovative and often controversial way theories of justice and the place of otherness in them are examined in detail and the tragedy of antigone is presented as the foundational myth of legality casuistry another forgotten tradition often contrasted with the reason of the law is next traced in the common law legal philosophies and the ideas of kant hegel heidegger derrida and levinas are discussed in an exploration of the ethical elements missing in modern justice the ethics alterity is then applied to a series of cases dealing with refugees the book concludes by proposing a theory of legal
