this book examines husserl s approach to the question concerning meaning in life and demonstrates that his philosophy includes a phenomenology of existence given his critique of the fashionable philosophy of existence of the late 1920s and early 1930s one might think that husserl posited an opposition between transcendental phenomenology and existential philosophy as well as that in this respect he differed from existential phenomenologists after him but texts composed between 1908 and 1937 and recently published in husserliana xlii grenzprobleme der phänomenologie 2014 show that the existential husserl was not opposed but open to the phenomenological investigation of several basic topics of a philosophy of existence a collection of contributions from a team of internationally recognized scholars drawing on these and other sources the present volume offers insights into the relationship

between phenomenology and philosophy of existence it does so by 1 delineating the basic outlines of husserl s phenomenology of existence 2 reinterpreting the tension between husserl s transcendental phenomenology and jaspers s and heidegger s philosophy of existence as well as kierkegaard s and sartre s existentialism and 3 investigating the existential aspects of husserl s phenomenological ethics thus focusing on neglected aspects of husserl s thought the volume shows that there is a consensus between classical phenomenology and existential phenomenology on the urgency of addressing the existential questions that in the crisis of the european sciences and transcendental phenomenology 1936 husserl calls the questions concerning the meaning or meaninglessness of this entire human existence the existential husserl represents a major contribution to the clarification of the historical and philosophical developments from transcendental phenomenology to existential phenomenology the book should appeal to a wide audience of many readers at all levels looking for phenomenological answers to existential questions
